

1 Create Account

1

Visit <https://www.traceablelive.com>

Click on New Account.

2 Enter Account/User Information

2

Fill in all required fields.

Note: Password must be a minimum of 8 characters including a number and a special character (!@#\$\$%^&*).

3 Enter Payment Info./ Confirm Charge

3

If this screen does not appear, go to log in screen, account settings and add payment information.

Note: Payment must be set up prior to adding a device to your service.

Click **Save Payment Info**

4 Begin WiFi Setup

4

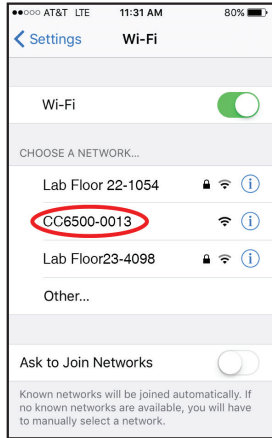

On device Press/HOLD WiFi button for 3 secs. "RP" will appear on display.

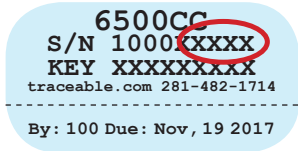

Wait for a few seconds then press (no need to hold) WiFi button, "RP READY" will appear on display.

Connect Unit to WiFi network via Mobile device

5

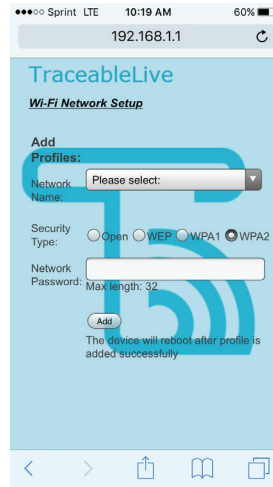

Using a WiFi enabled device (smart phone, tablet, etc.), find **CC6500-XXXX** in available networks. XXXX will be last 4 digits of unit's S/N# (on back of unit).

Open Web Browser on your mobile device

6

Enter into web browser: **192.168.1.1**

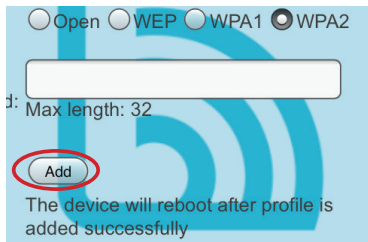

Select desired local network to which the device will be connected, and enter password for network.

The most common network is **WPA2**.

Press Add/Confirm device restart

7

Click Add

Unit will reboot, connect to WiFi, and begin posting data.

Note: Upon successful connection, you will receive an error message in your browser (Example: Safari cannot open the page because the network connection was lost.), and device reboot may take up to 1 minute, mobile will exit WiFi.

Note: The WiFi symbol will flash on device display until the device posts data successfully.

Note: ALLOW UP TO 30 MINS FOR DEVICE DATA TO UPDATE AND START TRANSMITTING DATA.

If an ERR message occurs on device, press acknowledge button (✓) and repeat steps 4-7.

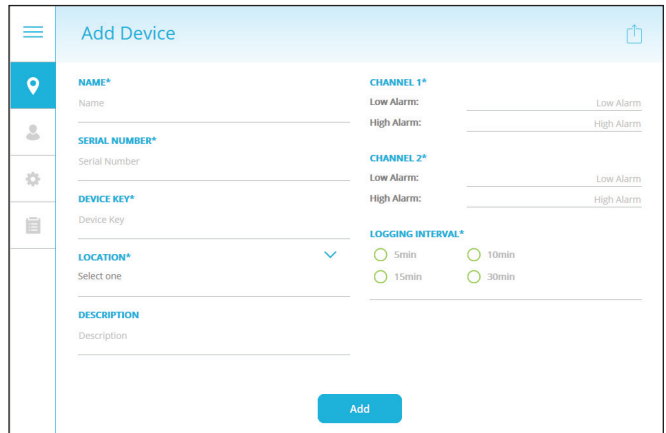

Log-in to TraceableLIVE account to manage device settings, alarms, users, and payment options.

Enter Device Information (located on back of unit)

8

Go to www.traceablelive.com

Click on Add New Device

Complete all required fields.

Enter S/N & Device Key

Device and account setup is now complete.
